

Ole Miss

Nanoengineering RESEARCH EXPERIENCES FOR UNDERGRADUATES

Come perform cutting-edge research in nanobiotechnology, sustainable nanoengineering or computational nanoengineering

What's included

- 10-week summer program at the University of Mississippi
- Undertake research and attend specialist seminars
- Enrich your knowledge of nanoengineering
- Present your findings to peers and academic community
- Gain skills for graduate school
- Mentor middle and high school students in STEM
- Experience historic Oxford, MS
- **You'll receive a \$6,000 stipend, on-campus housing, and allowances for food and travel**

To apply, send us:

- Your resume or CV
- A copy of your transcript (official or unofficial)
- A statement of research motivation
- Two letters of recommendation

Summer 2023 REU application period opens in November 2022 at: nanoreu.olemiss.edu

This program is funded by the National Science Foundation (EEC, EPSCoR: 2148764)
